During the 2015-16 school year our donors have allowed the Danville Public School Foundation to help fund over $73,000 in projects and programs.

Whether it is through a classroom grant, a school-wide assembly or one of the many Foundation initiatives the Danville Public School Foundation is there to offer assistance.

Children have their tickets punched on the Polar Express.

North Ridge Middle School's
Cast of the Lion King Experience

Since 1989, our goal at the Danville Public School Foundation has been to help provide enhanced educational opportunities for the over 6,000 students attending Danville Public Schools.

Through our ***Classroom Grant Program,*** teachers may apply to the Foundation to fund new, creative, and/or innovative projects in their classroom. This can be to introduce a new learning concept or idea, purchase learning materials, or technology equipment not currently budgeted by the District which enhances the basic curriculum.

We offer ***School-wide Assemblies*** for all of our 11 schools, providing professional speakers from across the country to address current topics. In the recent past, these programs have focused on positive life choices, overcoming obstacles, anti-bullying themes, and health and wellness programs.

We also fund ***Foundation Initiatives***. These projects are larger in scope and often involve a partnership with District 118.

Danville Public School Foundation

Making a Difference
